DESK ECONOMICS · WHAT AN IDEA COSTS

Most ideas die early, and cheaply.

58 ideas run through the desk, by the last stage each one reached.

Source: vault/3 Research Log/_desk/Desk economics.csv, one row per idea, written by the desk chief, 24 Oct to 3 Nov 2026. Tokens as logged from each agent's result; a few are estimates, and a reopened idea counts only its reopening.

Half the ideas cost thirty thousand tokens to kill. The expensive seats only run on what survives.
